

The ***USAlert Alpha 2 Pager Nylon Carrying Case*** is an accessory that can be used as an alternative when wearing an Alpha 2 Pager. Each Alpha 2 comes with a standard holster included, the nylon carrying case giving the user another wearable option for the pager. The attractive black nylon case has excellent abrasion resistance and protects the pager from daily wear and tear.

A top flap on the case covers the pager and attaches to the front of the case with a Velcro strip, holding the pager securely in place. Simply detaching the Velcro flap allows the user to easily remove the pager from the carrying case and read any incoming or existing messages.

The backside of the carrying case comes in two optional configurations. The "Belt Loop" configuration has a rear flap that fits over a belt and is attached by snapping a pair of metal fasteners together. The "Belt Clip" version uses an integrated black metal clip that easily slides over a belt for a secure connection.
