

The ***Unication Alpha Elegant Pager Holster*** is made of durable molded plastic material with a semi-transparent smoke-black color, making an attractive combination with the black housing of the Alpha Elegant pager. The holster design allows for quick removal of the pager from the holster when a message is received and desired to be read. The holster's transparency allows the user to read a message without having to remove the pager from it and also protects the pager's LCD from damage.

The Alpha Elegant Holster is common for the entire line of Unication Alphanumeric pagers. This holster can be used interchangeably with the Alpha Elite and Alpha Legend Plus pagers. Although each Alpha Elegant pager comes standard with a holster included, individual replacement holsters are available if needed.
