

Although the **Unication Alpha Elegant Pager** comes standard with a holster included, an attractive black **Nylon Carrying Case** is also available giving you another option when wearing your pager. The Alpha Elegant Nylon Carrying Case includes a top flap that covers and protects the pager and attaches to the front of the case with a Velcro strip. The Velcro design allows easy retrieval of the pager when messages are received.

The carrying case can be selected with either of two backside configurations. The "Belt Loop" version has a rear flap that can be secured over a belt by snapping a pair of metal fasteners together. The "Belt Clip" version has an integrated metal clip attached to the back of the case for sliding over a belt. The Alpha Elegant Nylon Carrying Case comes in one size and is compatible with the entire line of Unication Alphanumeric pagers. Along with the Alpha Elegant, the case can also be used to carry the Alpha

Elite and Alpha Legend Plus pagers.
